## Alaska Weather Information Line

The National Weather Service Alaska Region established the Alaska Weather Information Line as a public service, providing toll-free telephone access to weather information throughout the state.

**Weather Forecasts** are issued on a regular basis and updated as required to provide accurate and timely weather information.

- **Public Forecasts** include area (zone) 7-day forecasts with information for communities in Alaska.

- **Marine Forecasts** are available for all coastal marine areas with outlooks to 5 days.

- **Observations** from certain land stations and marine buoys are available. This information is updated hourly.

The menu system is organized according to geographical area:

Northern Alaska	Southwestern Alaska
Southcentral Alaska	Southeastern Alaska

Complete and comprehensive weather information, including warnings, statements, forecasts, observations and climate information are available online at [weather.gov/alaska](https://weather.gov/alaska).

## General Instructions

- Dial the Alaska Weather Information Line.
- Listen to the menu options and make your selection for the area you want.
- Forecast areas are listed inside this leaflet.

Once you are familiar with the menu options you can enter the numbers at any time without listening to the entire message, however we recommend having a brief pause between each digit.

Example: The forecast for Shelikof Strait can be obtained by pressing 3 3 2 6:

3 – South Central Alaska Menu  
3 – Kodiak Menu  
2 – Marine Menu  
6 – Shelikof Strait

You can press the pound (#) sign at any time to return to the previous menu.

Recorded weather information and this brochure are also available at [weather.gov/arh/awil](https://weather.gov/arh/awil)
